

Pro SaniWell

FILTER-MATE® SANIWELL

Using SaniWell twice a year will help keep wells free from iron and bacteria build-up, improving the smell and taste of the water. A well should be sanitized if it has been contaminated or disturbed as a result of repairs. SaniWell pellets and granules are designed to help purify and eliminate harmful bacteria in storage tanks, well casings, fixtures and pipes.

Applications

- When used as directed, SaniWell:
- Kills bacteria
- Helps clean up iron problems
- Prolongs well pump life
- Cleans iron and bacteria build up from well casings
- Eliminates rotten egg smell

Dicrection For Use

- Pour SaniWell into well from well casings
- Circulate with hose
- Let stand for 8-24 hours
- Flush until clear

Well Diameter	Gallons of water per 100 ft.	Oz. of Granules to achieve 50 ppm	Number of Pellets to achieve 50 ppm
